TESTIMONY

I graduated in 1961 with a chemical engineering degree. Paula and I were married in 1961, and she got her nurse's RN that same year.

We attended church when in high school, and sporadically after that, until we moved to York, PA. There was a new birth there and we were saved at age 39. We became very involved with church and then moved to Newark, DE where we got even more involved with church activities.

I especially liked Bible studies and started going to the Smyrna Prison to lead Bible studies. I did that for 40 years, until Covid messed things up.

I love science and I see it through all of creation. I want people to learn from a person who lived for science that creation is real. At the prison I was called the "Bill Nye of creation". I presently lead two Bible studies, one at work and one in our church Life Group.

Paula transitioned to Glory in 2022 and I have become closer to my Savior. I am looking forward to that BLESSED HOPE! It is just around the corner for me. I plan to meet many of the Smyrna Bible study men on Wednesdays at 6:30 in the Eternal City on the eastern side of the river which flows from the throne.

What a time awaits us!
